DEFINITION: Miniature paintings and sculptures are fine art on a small scale, with minute attention to detail, which can withstand close inspection or enlargement. As a guideline (not a rule) for a general definition of small scale, a subject should be no larger than 1/6th actual size. A human head is about 9 inches so the painted head should be no larger than 1½". Subjects too small for portrayal in 1/6th scale or nonrepresentational work such as abstracts or surrealism may meet the spirit of a miniature if the work meets the above definition of miniature art.
